

IMPORTANT INFORMATION REGARDING YOUR STUDENT'S TRAINING

Attention Flight Schools and Flight Instructors,

You probably already know that you have a very motivated individual interested in becoming a pilot and learning from you. What you may not know is that your student is already off to a fantastic start to his training by participating in a valuable program offered through EAA. Thank you for taking the time to read this message as it will help ensure the continuation of his or her success.

Your new student took advantage of a tremendous opportunity to begin his aviation journey by taking an EAA Young Eagles flight. The Young Eagles program gives interested young aviators an opportunity to take a free flight in a general aviation airplane.

This motivated young person took their Young Eagles experience a step further and also took advantage of a program called Next Step – a partnership program from EAA and Sporty's that takes the Young Eagles flight a "step" further. The goal of Next Step is to help move young pilots from the right seat to the left seat by providing a clear path for success in a complete flight training package that now requires your help.

As a Young Eagle, your new student was given free access to Sporty's Complete Online Pilot Training Course. Sporty's Training Course provides flight and ground training through the use of in-flight video training, 3D animations and graphics and much more. This course prepares students for the written, oral and flight tests.

Included with the online course is an approved training course outline (TCO) that can be used as your official syllabus to train your new student. The TCO serves as the bridge between your student's at home study and what they will accomplish in the air with you. The TCO will allow for consistency throughout the training process. To access the TCO, simply have your student log-in to his account. The TCO can be edited online or you may choose to print certain lessons. All of your grades and comments will be saved automatically when you log out.

Thank you for helping your student take full advantage of his free online flight training course. To learn more about this program, visit sportys.com/youngeagles.
